

# Génération automatique d'un catalogue standardisé à l'OSU OREME

Utilisation de R et des bibliothèques geometa et geonapi

# Contexte

## Suite de SIST16

“Mise en place de catalogues INSPIRE et de leur alimentation automatique” ([voir](#))

## Dans les épisodes précédents ..

- OREME : 24 Services d'Observation, grand nombre de jeux de données géoréférencés
- Métadonnées sous PostgreSQL / PostGIS
- Obligation de cataloguer nos données (Inspire) – norme ISO19139
- Outil choisi : GeoNetwork 3
- Problématique : alimenter automatiquement GN à partir de la bdd

?

# Solution

Basée sur les librairies R `geometa` et `geonapi`

- Fév 18 : atelier “R et métadonnées”, E. Blondel & J. Barde, RBDD / SIST
- **geometa** : gérer des métadonnées géographiques ISO/OGC :
  - Écrire ISO19139
  - Lire
  - Valider (XSD / ISO / Inspire) ISO19110 (dictionnaires de données)
  - **Convertir** : NetCDF - EML
- **geonapi** : Interface R – API GeoNetwork
- **geosapi** : Interface R – API GeoServer
- En cours de dev : **geoflow** : orchestrer la gestion / publication de (méta)données géospatiales
- En cours de dev : **ows4R** : interface R – Web Services OGC (WFS, CSW, ..)

# Solution

Générer de l'ISO valide Inspire => wiki geometa

# Time series of type chemistry in Fontaine de Vaucluse basin - FONTAINE DE VAUCLUSE observatory - KARST observatory network -OZCAR Critical Zone network Research Infrastructure

Updated: 6 days ago

Data of type chemistry measured on Fontaine de Vaucluse basin within the framework of the FONTAINE DE VAUCLUSE observatory, that is part of the KARST observatory network. The KARST observatory network aims to strengthen knowledge-sharing and to promote cross-disciplinary research on karst systems, in the framework of the OZCAR Critical Zone network Research Infrastructure. Data consist in 4 time series on 2 station(s). The measured parameters are: Conductivity ( $\mu\text{S}/\text{cm}$ ), Water temperature ( $^{\circ}\text{C}$ ). Measurements are regularly updated with new data. The data are made public after a 30-month embargo.
